

Jqueryassignment

1 What is jQuery?

:- jQuery is a lightweight, "write less, do more", JavaScript library. The purpose of jQuery is to make it much easier to use JavaScript on your website. jQuery takes a lot of common tasks that require many lines of JavaScript code to accomplish, and wraps them into methods that you can call with a single line of code.

2 How to Apply CSS Using JQuery, How to Add Class and Remove Class in JQuery , JQuery Animation?

:- `addClass(className [, duration] [, easing] [, complete])` One or more class names (space separated) to be added to the class attribute of each matched element. A string or number determining how long the animation will run. A string indicating which easing function to use for the transition.

3 How to create slider with animation?

:- An animation is a special effect that applies to a single element on a slide such as text, a shape, an image, and so on. A transition is the special effect that occurs when you exit one slide and move on to the next during a presentation.
